A note on the NDIS Price Guide

The below prices reflect the [NDIS Price Guide 2020-21](#) and are subject to change with subsequent revisions to this guide. These prices include the [Temporary Transformation Payment \(TTP\)](#), which is a higher support price limit set by the NDIS to assist eligible service providers with the costs of transitioning to the scheme.

Personal Support and Home Care Services

Our Personal Support and Home Care Services include assistance at home and at work, as well as support to access the community and participate in activities.

The NDIS Price Guide classifies support services in different ways, depending on the level of skills, experience and training that support workers require for each individual shift. These classifications are *Standard Intensity* and *High Intensity*, with the *High Intensity* category split into Levels 1, 2 and 3.

High Intensity shifts involve more complex routines which require increased staff capability, competencies and responsibilities. This includes bowel therapy, working with people with significant health and medical conditions, extended exercise regimes, PEG feeding, assistance with diabetes management, respiratory complications, skin integrity monitoring, managing frequent spasming, recognising and responding to episodes of autonomic dysreflexia and complex hoisting regimes.
