

COMMUNITY NURSING

Our Community Nurses take care of complex needs or challenges that you may have as the result of spinal cord damage and other physical disabilities.

How we can help you

There are several reasons why you may benefit from seeing a Community Nurse these include:

- Bladder and bowel management including catheter changes, PEG changes and carer training
- Wound care management and assessments
- Tracheostomy changes and ventilator issues
- General health assessments, including diabetes management, medication reviews and more.

Experience the Spinal Life difference

Our highly trained Community Nurses specialise in spinal cord damage and other physical disabilities and are dedicated to looking after your health and wellbeing. We work directly with you in one-on-one sessions, in the privacy of your own home, in our consultation room or via telehealth, where we tailor your treatment to your specific needs, you'll be in safe hands!

Where do we offer community nursing?

In our clinic
located in Brisbane

Telehealth*

At your home
Brisbane area only

We provide this service to adults and children with all types of injuries and disabilities regardless of the severity of the injury, or how recent or old that injury is.

** not all nursing programs can be carried via Telehealth.*
